Point of Demarcation: Existing Segra Demarc		**Point of Demarcation:** Existing Segra Demarc	

Acknowledgements: Customer acknowledges and agrees that the Services ("Service(s)") provided to Customer in this Service Order will not be accessible to Customer other than at the Location A and Z Points of Demarcation listed above. Segra shall have the option to terminate this Service Order without liability if Segra determines that providing the Services to Customer will be commercially unreasonable for Segra.

Dark Fiber Terms, Electronics, and Equipment: If Customer is receiving a Dark Fiber Service ("Customer Fibers"), in no event shall Segra be responsible for obtaining on behalf of Customer any equipment used to transmit capacity over or "light" such Customer Fibers. Customer's use of Customer Fibers shall be limited to Customer. Customer may not assign, lease, or allow any other party the right to use the Customer Fibers or related Segra materials without Segra's prior written consent. The foregoing restriction includes Customer's resale of the Customer Fibers as a "dark fiber" service. Any use of the Customer Fibers by Customer in contravention of this Section shall be considered an event of default and grounds for immediate suspension of service. Subject to Segra's consent, Customer may attach electronic equipment to the Fibers. At Segra's request, Customer will notify Segra of the type, detailing optical wave, and bandwidth associated with such electronics. Any interference by Customer's equipment with Segra's network, facilities, or fibers shall be grounds for withholding or revoking consent. Each Party shall take all reasonable precautions to prevent damage to Segra's network and the Customer Fibers. Customer must immediately remove any equipment adversely impacting the Customer Fibers or Segra's network immediately upon notice from Segra.

Term: The term of this Service Order shall commence upon the first date following completion of installation of all Services described herein and continue for the term delineated above ("Initial Service Order Term"). Thereafter, this Service Order shall automatically renew for successive one (1) year periods (each such period, an "Additional Service Order Term" and, together with the Initial Service Order Term, the "Service Order Term") unless terminated by either Party upon ninety (90) days' written notice to the other Party prior to the end of the Initial Service Order Term or Additional Service Order Term, as applicable.

Points of Demarcation: Unless otherwise specified herein, the point of demarcation at each service location shall be the minimum point of entry ("MPOE"). The MPOE is the point at which Segra's cable enters the building. In the event Customer requires a point of demarcation extension, additional costs may apply. Customer shall be responsible for all cross connects.

Interstate Traffic: If Customer is receiving a private line service, Customer acknowledges and certifies that the interstate traffic (including Internet and international traffic) will constitute ten percent (10%) or less of the total traffic on the private line provided by Segra. Customer shall notify Segra if the Customer's average usage exceeds this ten percent (10%) threshold.
